Building Your Future in Business Management

At every great company, there is a group of leaders who drive the team toward success. Turn your passion for motivating others into a fun and rewarding career in business management. From finance to operations, there are many opportunities in the field and a number of different ways to pursue them.

Stackable credentials at Miami Dade College are a great way to build a career and become a more valuable asset to potential employers. Whether you earn an industry certificate or complete an associate degree program, MDC's stackable credentials give you the opportunity to earn industry-related credentials while progressing along your career pathway.

Stack your credentials toward a bachelor's degree or use them as résumé building blocks on the way to a higher-level position.

MDC offers an overall credentialing system of more than 72 college credit certificates, 35 career technical certificates, 49 industry certifications, 65 associate degrees and 17 bachelor's degrees. Stacking credentials gives you the flexibility to work at your own pace while you gain real-world experience.

It's education tailored to you.

How Stackable Credentials Work

Stackable credentials are a sequence of industry-related credentials that can be expanded over time. Use your credits to work toward earning a degree or increase your qualifications and move up the career ladder.

Industry Certificate (IC): A credential awarded by an industry or industry group that verifies that an individual has met the skills required to work in a given field.

College Credit Certificate (CCC): A credential with specific job skills related to an Associate in Science (A.S.) degree.

Associate in Science Degree (AS): Consists of lower division general education and career technical education college credit courses designed to prepare individuals for entry-level employment.

Advanced Technical Certificate (ATC): Available to students who have already been awarded an associate or bachelor's degree and wish to enhance their skills.

Bachelor's Degree (BS): Prepares individuals for entry into employment in targeted occupations. You must complete associate degree requirements before admittance to the bachelor's degree program.
